

Mary Kulpon

I support a complete ban on fracking in the Delaware River Basin. Please choose to fully protect all communities by also including a ban on importing fracking waste water to the Delaware as well as exporting water from the Delaware for fracking. In order to ensure a good quality of life for all citizens, please protect our drinking water as well as a source of recreation and tourism for all. It is imperative for the safety of our communities, the future of our children, and the viability of our economy that the Delaware is a protected natural resource for all.
