

Leslie Martin-Borsuk

I am the owner of a home on a lake in the Delaware River Basin. Based on our experiences with a test well near the property I can see no benefit that the fracking industry can offer. Jobs were filled by workers brought in from Texas and the truck traffic disturbed the main industry in our area, which is tourism. Our water supply, health, and property were put in jeopardy. The Delaware River Basin is a precious resource. Please pass regulations that serve to protect it and not corporate interests.
