

## Susan Garelik

I just got home from the hearing and want to add one comment as a voter and scientist living in the Delaware River basin.

This area is already so degraded and polluted by past extraction and by ongoing fossil fuel extraction and use that to add to the burden of pollution experienced by all living things here situated would be a major dereliction of your duty to protect the watershed, the river and their inhabitants.

Please place a permanent ban on all fracking and fracking related activities in our home!

Thank you
