I disagree with the proposed rules being drafted by this commission concerning gas drilling. The commission is taking a one sided approach of fear on this issue and doesn't look at the whole picture of why the process is even done. We as a society need to embrace the technologies we develop and not be ignorant to them and say not in our backyard. This industry creates millions of jobs and is a critical element of how we live as a modern society. As a society we voted to stop this way of one sided type of thinking and governing when we voted to change the countries direction with President Trump. I only hope that this committee comes to it's senses and reverses it's stance on this topic and helps support the energy industry. If it doesn't we can only send our concerns to the President and hope he cuts funding to this commission. God bless this country and my family and I hope you make the right decision concerning this topic and reverse these proposed rules.
