

Donna Yavorsky

We want a full fracking ban. We do not want waste water from fracking operations elsewhere to get into our watershed. The Delaware is a source of drinking water for many, and needs to become even more clean. The Delaware is a source of very meaningful recreation for many, and needs to be kept clean. This recreation is a source of employment for many, and needs to even increase. You must take ALL MEASURES to protect this significant resource for all the states it touches.
