

## Joshua Kors

I live in NYC, I love NYC's delicious water, and I fiercely oppose fracking and all fracking-related activities. I applaud the DRBC for banning fracking, and I implore you to make that ban permanent.

Please show moral strength, don't cave in to the gas companies that want to enrich themselves while poisoning our water. Do EVERYTHING you can to protect our water. Right now you're considering regulations that would leave open the possibility of water withdrawals and wastewater processing, storage and disposal related to fracking outside of the Basin. CLOSE that awful possibility. Reassure us that our water is safe by giving the gas companies the boot. You can do it.

It's our water. You can stop it from being poisoned. Don't turn us into one of those unfortunate families from "Gasland" who allowed fracking-related activities, received assurances from the gas companies that their water would not be spoiled, yet soon enough end up able to light their own tap water on fire.

Protect our water. Ban fracking and all fracking-related activities PERMANENTLY!
