

Megan Peterson

Pennsylvania and surrounding states worked for decades to return our waterways, lands, and air to a clean condition that is sustainable and provides a healthy environment for us all to live, plus increased recreational opportunities that are necessary for everyone and a solid tourism economy.

It has been incredibly stupid and short-sighted to throw this all away and endanger our water sources with fracking and its toxic byproducts. There is also ample evidence in states like Ohio, Texas, and Oklahoma of the danger of fracking to the stability of the very ground under us.

The fracking industry in Pennsylvania has already produced more than enough well locations and should be stopped from expanding. NO threats of any kind should be allowed to the Delaware River Watershed. It is too important to our survival. There is nowhere else to go for clean water for millions and millions of people — including you and your family — in the four-state area in the Watershed. NOWHERE. It should be protected at all costs.

Please ban fracking throughout the Watershed, ban frack wastewater from being dumped here, and ban Delaware River Watershed water from being exported to fuel fracking elsewhere.

Thank you,
Megan Peterson
