

Lisa Levine

Many communities are struggling against pollution, fossil fuel extraction, and more threats to their water sources. Recently, the Delaware River Basin Commission proposed regulations banning fracking in the River Basin. Unfortunately, those regulations don't protect ALL communities – they continue to allow for the exportation of water from the Basin to fracking elsewhere AND the importation of wastewater into the Basin for treatment. This is unacceptable – please don't allow other communities to be harmed; protect ALL communities by banning fracking from the Basin.
