

## Marianne Hines

Please act to safeguard the health of the millions of people in the Delaware River basin, and its downstream denizens as well. The beauty and cleanliness of our environment is a moral responsibility for us to uphold and defend. We owe this to ourselves and to the future, our children and future world which depend on our actions.

Fracking isn't even the smartest way to invest in power. Sustainable, clean energy will own the best of the future. Let's get with it.
