

350 Bucks County In Solidarity with the Delaware Riverkeeper Network

During the seven years of the DRBC drilling moratorium, scientific studies have exposed the harms, the damaging health effects are being proven, New York and Maryland have banned fracking, and the weight of evidence shows that shale gas simply cannot be extracted safely. The DRBC is responsible for protecting the water resources of the Delaware River Watershed — upon which 17 million people rely for their drinking water. This water supply and the Wild and Scenic Delaware River are irreplaceable.

DRBC – ENACT A PERMANENT BAN ON FRACKING

To the Delaware River Basin Commission voting members - the Governors of New York, Pennsylvania, New Jersey and Delaware, representing the Basin states, and the Army Corps of Engineers, representing the federal government:

We, the undersigned, call for the Delaware River Basin Commission (DRBC) to enact a permanent ban on natural gas drilling and fracking in the Delaware River Watershed. During the seven years of the DRBC drilling moratorium, scientific studies have exposed the harms, the damaging health effects are being proven, New York and Maryland have banned fracking, and the weight of evidence shows that shale gas simply cannot be extracted safely. The DRBC is responsible for protecting the water resources of the Delaware River Watershed — upon which 17 million people rely for their drinking water. This water supply and the Wild and Scenic Delaware River are irreplaceable. The time to enact a permanent ban is NOW.

DRBC – ENACT A PERMANENT BAN ON FRACKING

To the Delaware River Basin Commission voting members - the Governors of New York, Pennsylvania, New Jersey and Delaware, representing the Basin states, and the Army Corps of Engineers, representing the federal government:

We, the undersigned, call for the Delaware River Basin Commission (DRBC) to enact a permanent ban on natural gas drilling and fracking in the Delaware River Watershed. During the seven years of the DRBC drilling moratorium, scientific studies have exposed the harms, the damaging health effects are being proven, New York and Maryland have banned fracking, and the weight of evidence shows that shale gas simply cannot be extracted safely. The DRBC is responsible for protecting the water resources of the Delaware River Watershed — upon which 17 million people rely for their drinking water. This water supply and the Wild and Scenic Delaware River are irreplaceable. **The time to enact a permanent ban is NOW.**

To the Delaware River Basin Commission voting members - the Governors of New York, Pennsylvania, New Jersey and Delaware, representing the Basin states, and the Army Corps of Engineers, representing the federal government:

We, the undersigned, call for the Delaware River Basin Commission (DRBC) to enact a permanent ban on natural gas drilling and fracking in the Delaware River Watershed. During the seven years of the DRBC drilling moratorium, scientific studies have exposed the harms, the damaging health effects are being proven, New York and Maryland have banned fracking, and the weight of evidence shows that shale gas simply cannot be extracted safely. The DRBC is responsible for protecting the water resources of the Delaware River Watershed — upon which 17 million people rely for their drinking water. This water supply and the Wild and Scenic Delaware River are irreplaceable. **The time to enact a permanent ban is NOW.**

To the Delaware River Basin Commission voting members - the Governors of New York, Pennsylvania, New Jersey and Delaware, representing the Basin states, and the Army Corps of Engineers, representing the federal government:

We, the undersigned, call for the Delaware River Basin Commission (DRBC) to enact a permanent ban on natural gas drilling and fracking in the Delaware River Watershed. During the seven years of the DRBC drilling moratorium, scientific studies have exposed the harms, the damaging health effects are being proven, New York and Maryland have banned fracking, and the weight of evidence shows that shale gas simply cannot be extracted safely.

The DRBC is responsible for protecting the water resources of the Delaware River Watershed — upon which 17 million people rely for their drinking water. This water supply and the Wild and Scenic Delaware River are irreplaceable. The time to enact a permanent ban is NOW.

DRBC - ENACT A PERMANENT BAN ON FRACKING

To the Delaware River Basin Commission voting members - the Governors of New York, Pennsylvania, New Jersey and Delaware, representing the Basin states, and the Army Corps of Engineers, representing the federal government:

We, the undersigned, call for the Delaware River Basin Commission (DRBC) to enact a permanent ban on natural gas drilling and fracking in the Delaware River Watershed. During the seven years of the DRBC drilling moratorium, scientific studies have exposed the harms, the damaging health effects are being proven, New York and Maryland have banned fracking, and the weight of evidence shows that shale gas simply cannot be extracted safely.

The DRBC is responsible for protecting the water resources of the Delaware River Watershed – upon which 17 million people rely for their drinking water. This water supply and the Wild and Scenic Delaware River are irreplaceable. The time to enact a permanent ban is NOW.

We, the undersigned, call for the Delaware River Basin Commission (DRBC) to enact a permanent ban on natural gas drilling and fracking in the Delaware River Watershed. During the seven years of the DRBC drilling moratorium, scientific studies have exposed the harms, the damaging health effects are being proven, New York and Maryland have banned fracking, and the weight of evidence shows that shale gas simply cannot be extracted safely. The DRBC is responsible for protecting the water resources of the Delaware River Watershed — upon which 17 million people rely for their drinking water. This water supply and the Wild and Scenic Delaware River are irreplaceable. **The time to enact a permanent ban is NOW.**

MY POEM TO TOM WOLF

I am the voice of the stillborn who cannot speak,
I am the voice for the disabled in pain,
I am the voice of the asthmatics who cannot breathe,
I am the voice for those you have slain.

They breathe the air that's polluted by toxins,
They drink the water that's darkened by grime,
They scratch their skin raw on all the red rashes,
They go to school on roads covered in slime.

You are the cause of their sufferings and agonies,
You are the cause of their writhing in pain,
FRACKING is killing our totally defenseless,
It has no sympathy for those it has slain.

(emailed to his offices several times, am distributing around)

I am a mother and a rabbi living in Philadelphia and I call upon each of you, who have been empowered with the sacred task of protecting the Delaware River Basin, to institute a permanent ban on fracking in the Delaware River Watershed. We find ourselves at a time of crisis for humanity and for the Earth upon which we live. On a global level, our burning of fossil fuels has warmed the planet, causing unprecedented heat waves, storms, and melting of the glaciers. On a local level, fracking is a highly polluting process that removes millions of gallons of fresh water from our rivers and increases air pollution, water pollution, and noise pollution, endangering public health. The states of New York and Maryland have instituted bans on fracking after evaluating the evidence coming out of fracking operations in states such as Pennsylvania.

We cannot allow business interests, which tend to focus on short-term profits, to take precedence over the common good. You have been tasked with protecting the River so that present and future generations in this area may have access to a peaceful river and clean water. There is no way to safely regulate fracking, and there is no way to prevent fracked gas from increasing the greenhouse gas load in our atmosphere, which is destabilizing our climate.

The only responsible path forward is a rapid transition away from extracting and burning fossil fuels. You have the opportunity to take leadership in supporting this transition by instituting a permanent fracking ban in the Delaware River Watershed. Thank you for your service on behalf of us all.

Submitted by Rabbi Malkah Binah Klein
Co-chair, Philadelphia Chapter of Pennsylvania Interfaith Power & Light (PA IPL)

Rabbi Malkah Binah Klein

RECEIVED

DRBC – ENACT A PERMANENT BAN ON FRACKING

To the Delaware River Basin Commission (DRBC) voting members - the Governors of New York, Pennsylvania, New Jersey and Delaware, representing the Basin states, and the Army Corps of Engineers, representing the federal government:

We, the undersigned, call for the Delaware River Basin Commission to enact a permanent ban on natural gas drilling and fracking and all related activities in the Delaware River Watershed. During the seven years of the DRBC drilling moratorium, scientific studies have exposed the harms, the damaging health effects are being proven, New York and Maryland have banned fracking, and the weight of evidence shows that shale gas simply cannot be extracted safely. The DRBC is responsible for protecting the water resources of the Delaware River Watershed — upon which 17 million people rely for their drinking water. This water supply and the Wild and Scenic Delaware River are irreplaceable. **The time to enact a permanent ban is NOW.**

Resolution on fracking in Del River Watershed
expected by environmental activists as

one step forward, 2 steps back

DRBC published draft resolution - that could ban
gas drilling + fracking but could allow the
storage, treatment and discharge of fresh
waste water and the withdrawal of water from
the watershed for fracking elsewhere.

11/30/17

proposed resolution is weaker than the moratorium
currently in place. that prohibits water extraction,
dumping of fracking waste & natural gas
storage

215 694-4783

DRBC – ENACT A PERMANENT BAN ON FRACKING

To the Delaware River Basin Commission voting members - the Governors of New York, Pennsylvania, New Jersey and Delaware, representing the Basin states, and the Army Corps of Engineers, representing the federal government:

We, the undersigned, call for the Delaware River Basin Commission (DRBC) to enact a permanent ban on natural gas drilling and fracking in the Delaware River Watershed. During the seven years of the DRBC drilling moratorium, scientific studies have exposed the harms, the damaging health effects are being proven, New York and Maryland have banned fracking, and the weight of evidence shows that shale gas simply cannot be extracted safely.

The DRBC is responsible for protecting the water resources of the Delaware River Watershed — upon which 17 million people rely for their drinking water. This water supply and the Wild and Scenic Delaware River are irreplaceable. **The time to enact a permanent ban is NOW.**

Delaware River Basin Commission

West Trenton, NJ

Dear Commissioners,

I support the Delaware River Basin Commission adopting a ban on gas and oil development in the Delaware River Watershed. The current prohibition on gas drilling and fracking was put in place in 2010 by the Commission based on the determination that natural gas projects, individually or cumulatively, will have a substantial impact on the River's water resources.

Since that time, scientific analysis and studies, public health statistics, the experience of communities where fracking is occurring, and government records show that the impacts of gas and oil development are significantly harming the environment including our water, air, habitats and communities' health, despite regulatory controls.

The Commission is responsible for safeguarding the water resources of the Delaware River Watershed and the water supply for 17 million people. In the face of the weight of evidence that gas and oil development has substantial adverse impacts and is therefore unsafe and unsustainable, it is incumbent upon the Commission to take action. We ask you, the Governors of the four states that flow to the Delaware River and tributary streams – Pennsylvania, New York, New Jersey and Delaware - and the U.S. Army Corps of Engineers as the federal representative, to immediately adopt a ban on all oil and gas development in the Delaware River Watershed.

Tell DRBC – Permanent ban on fracking now!

Since 2010 the Delaware River Basin Commission (DRBC) has prohibited permitting for natural gas extraction projects in the Delaware River Basin while they study its potential impacts on water resources, a *de-facto* moratorium that does not allow permits to be issued until natural gas regulations are adopted.

Since that time, scientific analysis and studies, public health statistics, the experience of communities where fracking is occurring, and government records show that the impacts of gas and oil development are significantly harming the environment including our water, air, habitats and communities' health, despite regulatory controls. The overwhelming weight of evidence supports that shale gas cannot be extracted or developed safely with current technology.

There seems to be new interest on the part of DRBC staff to rekindle the development of gas development regulations, which would lift the current moratorium. We must tell the DRBC that **NOW IS THE TIME** to enact a permanent ban on all gas development, including drilling and fracking, in the Delaware River Watershed.

If you represent an organization, please sign your organization on to the letter to DRBC here: <https://goo.gl/forms/CscGxzxtaVh0OF8g2>

As an individual, please take a stand to stop fracking from starting by signing and sending the letter on the back or go on line here: <http://www.delawariverkeeper.org/node/4540>

I support the Delaware River Basin Commission adopting a ban on gas and oil development in the Delaware River Watershed. The current prohibition on gas drilling and fracking was put in place in 2010 by the Commission based on the determination that natural gas projects, individually or cumulatively, will have a substantial impact on the River's water resources.

Since that time, scientific analysis and studies, public health statistics, the experience of communities where fracking is occurring, and government records show that the impacts of gas and oil development are significantly harming the environment including our water, air, habitats and communities' health, despite regulatory controls.

The Commission is responsible for safeguarding the water resources of the Delaware River Watershed and the water supply for 17 million people. In the face of the weight of evidence that gas and oil development has substantial adverse impacts and is therefore unsafe and unsustainable, it is incumbent upon the Commission to take action. We ask you, the Governors of the four states that flow to the Delaware River and tributary streams – Pennsylvania, New York, New Jersey and Delaware - and the U.S. Army Corps of Engineers as the federal representative, to immediately adopt a ban on all oil and gas development in the Delaware River Watershed.

Tell DRBC – Permanent ban on fracking now!

Since 2010 the Delaware River Basin Commission (DRBC) has prohibited permitting for natural gas extraction projects in the Delaware River Basin while they study its potential impacts on water resources, a *de-facto* moratorium that does not allow permits to be issued until natural gas regulations are adopted.

Since that time, scientific analysis and studies, public health statistics, the experience of communities where fracking is occurring, and government records show that the impacts of gas and oil development are significantly harming the environment including our water, air, habitats and communities' health, despite regulatory controls. The overwhelming weight of evidence supports that shale gas cannot be extracted or developed safely with current technology.

There seems to be new interest on the part of DRBC staff to rekindle the development of gas development regulations, which would lift the current moratorium. We must tell the DRBC that NOW IS THE TIME to enact a permanent ban on all gas development, including drilling and fracking, in the Delaware River Watershed.

If you represent an organization, please sign your organization on to the letter to DRBC here: <https://goo.gl/forms/CscGxztaVh0OF8q2>

As an individual, please take a stand to stop fracking from starting by signing and sending the letter on the back or go on line here: <http://www.delawariverkeeper.org/node/4540>
