Dear Commission: with regards to the upcoming public forum on the tighter fracking ban proposal, I am all for it. I cannot attend the meetings but the tighter the ban to restrict fracking and the restriction to ban dumping fracking waste in the Delaware River basin is a good one. We cannot allow ourselves to be so short-sighted and arrogant as to think that fracking will not pollute our drinking water supply today, tomorrow or in the future. Thank you, Mrs. Bair
