

Ann Bastian

I urge you to ban fracking and all its by-products from the Delaware River Basin. I live 10 minutes from this beautiful river along its NJ tributaries and I feel that we have no greater legacy to offer our grandchildren and future generations than a clean, healthy river system. As climate change stresses our environmental assets, why add dangerous toxins and fouled water to the challenges ahead. Vote for the future, and honor those like Gifford Pinchot who left the Upper Delaware for us to enjoy and protect today.
