"Our examination...uncovered no evidence that fracking can be practiced in a manner that does not threaten human health," states a blistering 266-page report released today by Concerned Health Professionals of New York and the Nobel Peace Prize-winning group, Physicians for Social Responsibility. Drawing on news investigations, government assessments and more than 1,200 peer-reviewed research articles, the study finds that fracking – shooting chemical-laden fluid into deep rock layers to release oil and gas – is poisoning the air, contaminating the water and imperiling the health of Americans across the country."
