

Marilyn Drucker

Comments: Dear DRBC Commissioners,

I am concerned about reading in my local newspaper that decisions are being made by you to allow shale fracking wastewater to be dumped into the Delaware River. If you are planning to ban drilling then it makes complete sense and responsibility on your part to also ban the dumping of shale fracking wastewater into the Delaware River that so many people depend on for their drinking water. Please, do not allow this to happen.

Thank you,
Marilyn Drucker, Registered Nurse and Resident.
