

# Amy Hansen

Greetings,

As a mother I want to see my children's future safeguarded, and I know that fracking is inconsistent with this hope. Please permanently ban natural gas drilling and fracking and all related activities (including wastewater processing and discharges from and water withdrawals for drilling and fracking operations) throughout the Delaware River Watershed.

Instead I ask you to support renewable energy expansion and development in our beautiful region. Renewables create thousands of jobs in the energy sector, help us achieve energy independence, and keep our air and water clean. Let's support them now!

Thank you,

Amy Hansen
