

## Kalle Weeks

I commend the fact that The Delaware River Basin Commission has proposed prohibiting hydraulic fracturing in the watershed and strictly regulating other water-related fracking. Having concluded after years of study that fracking "presents risks, vulnerabilities, and impacts to surface and ground water resources the Commission is doing its best to protect not only the Delaware River but also the fish, birds and other wildlife that depend on the river as habitats and sustenance. Please continue to ensure that our natural world and the river that runs through it are safeguarded now and for decades to come.
