

## Chip Walker

Your fracking ban proposal is completely unjustified. Hydraulic fracturing has never polluted water supplies. There is absolutely no proof of this!! Gas drilling is a proven safe process with tremendous benefits to our people and economy. Why can you stop it in your basin but allow it in other areas? I am completely against this ban and will fight it vehemently. Please show me how the susquehanna river basin has been negatively affected. Please lift your ban and allow drilling in this region.
