

## Maude Rith

Please completely and permanently ban fracking and its related activities in the Delaware River Basin. By this I mean drilling, water withdrawal and wastewater processing, storage and disposal related to fracking activities occurring outside of the Basin.

The Delaware River Basin is the source of drinking water for 15-17 million people, including NYC and Philadelphia. People and wildlife depend on it. Fracking puts that water at risk as a tool and part of the mixture of stored fracking chemicals. The commission made up of representatives from the Army Corps of Engineers and Governors from PA, NY, NJ and DE agree. Please ban all fracking activities in the Delaware River Basin.
