

## The Blue Pig - ice cream factory

I urge you to BAN fracking in the Delaware river area.

I own a locally sourced food business that is thriving in this atmosphere of " local food movement".

Unfortunately, I have been avoiding purchases from farms in Pennsylvania due to the fracked waste water issue and contaminated waters.

Our food and our DRINKING water depend on clean water. Each fracking well produces 1-4 million gallons of toxic waste water- that can't be put back into the water system.

Ban fracking Now to stop this unsustainable system that poisons our waterways forever.
