

Catherine Kulpon

I support a full ban on fracking in the Delaware River Basin. In addition I support a ban on releasing fracking wastewater into the Delaware as well as using water from the Delaware for fracking activities. It is essential to all citizens to keep the Delaware clean as it's a source of drinking water for many. It is also essential to the wildlife and the viability of the economy in these areas, which rely heavily on tourism generated by the river. Please do the right thing and listen to the will of the citizens on this matter.
