

George Dempsie

As a citizen of Pennsylvania, I am writing to the Delaware River Basin Commission to encourage you to ban fracking in your watershed. It is alarming to think of the repercussions when (and I don't say "if" because I know it happens) the wastewater gets into a watershed. We cannot be cavalier about the clean water that we have in our country. It is a resource that has limits and when we end up with no clean water, we cannot survive as a species. Please BAN fracking in your watershed.

Sincerely,
George Dempsie
