

Patricia Hartigan

I urge you to ban ALL fracking in the Delaware River Basin. Not just high volume. Protect EVERY community. You have this important responsibility and opportunity to act now. Clean water is disappearing from the planet. We MUST BEGIN TODAY to establish new efficient methods of keeping our waters - our rivers and our oceans clean and fit for human consumption. Human Life depends on it. We are - each of us - 70-80% water. Please regulate for clean water.

Today is 25th Anniversary of World Water Day at the United nations. I attach their statistics. We must keep our water clean. There is no time to waste.
