

## Mary Derstine

As a Girl Scout leader, our troops used to study this magnificent river when we stayed at Camp MOGISCA. We used to raft on the Delaware also. I spent days studying the recreational use of the area while attending two week courses offered through NEW JERSEY SCHOOL OF CONSERVATION. Over many years my family and friends canoed, kayaked camped and participated in ELDER HOSTEL Programs.

We all loved and respected this important recreational area and met so many people whose lives depended on clean water.

No fracking or destruction can be permitted in the Delaware River Basin.

Alternative clean energy must be utilized and NOT FRACKING
