

## Trudy Lyckowski

TO DRBC,

You have a COMPACT that states to PROTECT the Delaware WATER! Making draft regulations is a powerful push, by such a small handful of the public opinionated individuals whom seem to care less, about millions of people and the affect, even ONE mistake, with this water supply can DO! What does the public outcry do in the summer months "when" The DRBC states "THE RIVER IS VERY, VERY LOW" AND PUTS OUT THE DROUGHT WARNING? Every year you see this, "LOW" water because of no rain! There shall be NO fracking in the Basin area, period! There shall be NO using the WATER resources millions of people need to sustain their "LIFE"! THERE IS EVEN AN IDEA THAT "THEY" CAN THEN DUMP """"TOXIC"""" WATER BACK INTO THE DRINKING WATER FOR MILLIONS OF AMERICANS? COME ON ALREADY! How long will this political elite push go on? WHERE ARE THE jobs? Open up all this land in Wayne County....LEASE it out to EMPLOYERS who will employ this failed Northeastern Pennsylvania area already. Waiting for Royalties from fracking only brings you crooked deals and some fast cash and why should you care... after...you got the money and ran? Where are you going to run when all that land you own is not marketable """"WHEN"""" not """"IF"""" things go wrong with your land and the water, for to many people, other than just, a selfish interest. WHERE ARE THE JOBS "ECONOMIC DEVELOPMENT" SOCIETY? So the only jobs you can dream of is the fracking and energy production? You won't do better than that! WHY, ALREADY? WHY?

LEAVE THAT WATER ALONE! FIND ANOTHER WAY TO CREATE WEALTH FROM YOUR LAND. PLEASE.

THANK YOU...
