

Donna Russell

ALL Fracking must be banned. Any pollution or destruction of any water source or aquifer poses a supreme danger to all life forms and should be a capital offense--because it is a type of murder--done knowingly and willfully. Sacrificing our water for profits in fossil fuel related production, a dying industry, is allowing corporate greed to override the God-given rights of people to have sufficient clean water, air and unpolluted land. Put the planet first, or the people will continue to sicken and die because of corrupt politicians serving their corporate ma\$terS.
