

Rebecca Canright

As a college student and New Jersey resident I care deeply about protecting our region's intrinsic natural legacy. I support achieving a complete and permanent ban on natural gas drilling and fracking and all related activities (including wastewater processing and discharges from and water withdrawals for drilling and fracking operations) throughout the Delaware River Watershed.

The most recent statistical analysis of the body of scientific literature by the Concerned Health Professionals of New York and Physicians for Social Responsibility, 685 peer-reviewed papers examining gas drilling and/or hydraulic fracturing ("fracking") were reviewed and the overwhelming majority of studies found evidence of or potential adverse impacts on water, air, and human health.

I believe in the alternative to fossil fuels: renewable energy. This benefits our environment and economy and keeps our energy sources trustworthy, reliable and in-state (unlike unpredictable, out-of-state fossil fuel sources).

Thank you for your time!

Sincerely,
Rebecca
