

Joe Pfister

A complete and permanent ban on natural gas drilling and fracking and all related activities (including wastewater processing and discharges from and water withdrawals for drilling and fracking operations) throughout the Delaware River Watershed is needed because the only sure way to prevent pollution from fracking and its activities is to totally ban it. It makes no sense to ban fracking, but allow its toxic waste to be dumped in the Watershed and our precious fresh water to be depleted for fracking. We need a complete and permanent ban now.
