

## Colleen Reilly

Dear DRBC,

My name is Colleen and I'm 18 years old. My favorite class this year is AP Environmental, and in this class we learned about the dangers of fracking. As a young person, I (hopefully) will be around for a long time, and will probably live to see the negative effects of fracking on the environment. I will have to live with this and so will my future children, and so will your future children and grandchildren. Fracking is not a good thing, and I am begging you to stop fracking in the Delaware River. Thank you for taking the time to read our responses.
