

Jena Laske

Dear DRBC,

- 1) Please do not allow the toxic wastewater produced by fracking to be stored, processed, and discharged in the Delaware River Watershed
- 2) Please do not allow Delaware River Watershed water to be exported from the Basin for fracking elsewhere

Freshwater is limited and finite. Humanity has entered a massive water crisis. I urge you to protect one of our most precious resources. We are going to have to share what little freshwater we have with those who have run out of water due to drought or misuse. If you don't understand water issues, please give up your seat to someone that has a deep understanding.

Sincerely,

Jena Laske
