

Steven Meyer

Hello

I am an avid fly fisherman who spends a lot of time on the Delaware river every year. I live in central NY but often drive down to the West and East branch of the Delaware. I applaud your work in stopping the hydro fracturing in the region around the river. I completely support not allowing water to be taken from the river for fracturing elsewhere and not bringing in fracture water to be treated. Water is an ongoing problem on the river and once this river is ruined it will never be the same wonderful place. Please help us preserve this amazing river. Thank you.
