

Paul Hoffer

Dear Commissioners:

I hope and pray that you look to Pennsylvania's past to guide your decision concerning Fracking and the waste it produces in the Delaware basin. The runoff from Mines is still poisoning streams, wells, and wildlife after over a 100 years of closing, do you not think the waste from fracking will not have the same consequences and unfortunately, it will probably have worse, do to the larger area. I hope you wake up and look your children in the eye and tell them you did everything within your power to prevent the future impact this waste will have on all future generations, and the lives that will be saved from the poison in the water. **JUST THE RIGHT THING.**

Thank You
Paul Hoffer
