

Christopher Serpico

As a concerned citizen living in the area that would potentially be impacted by the DRBC's decision, I would like to voice my vehement opposition to the proposal being floated to allow fracking wastewater to be imported, stored, processed and discharged into the Delaware River Watershed. Short term gain for the benefit of private corporate interests will pose a serious risk to the health of the entire Delaware Valley. A risk/reward analysis in this situation heavily weighs in favor not only of a ban on fracking, but also on prohibiting the Delaware Valley Watershed to be used in the way suggested by the proposed rule. IT MUST BE VOTED DOWN.
