

Lynda Yankaskas

I strongly support the proposed ban on fracking in the Delaware River Basin. I also ask that the ban be extended so that the export of wastewater for fracking elsewhere and the importation of wastewater from fracking elsewhere for treatment within the Basin are also banned. We know beyond any doubt that fracking endangers drinking water on which all life (human, animal, and plant) depends. As a citizen of Pennsylvania and a resident of the Delaware River Basin, I want to be able to trust that my water will remain clean, free from the threat of fracking chemicals and associated environmental damage. Please impose and extend the ban on Delaware River Basin fracking.
