

David Bruce MacInnes

The DRBC issued draft natural gas regulations on Nov. 30. It proposed a ban on fracking but, illogically, also issued draft regulations that would ALLOW THE TOXIC WASTEWATER produced by fracking to be stored, processed, and discharged in the Delaware River Watershed and allow water to be exported from the Basin for fracking elsewhere. It is critical that we make it clear that we want to BAN IT ALL – ban fracking throughout the Watershed, ban frack wastewater from being dumped here, and ban Delaware River Watershed water from being exported to fuel fracking elsewhere.

This moment has been years in the making. We want to encourage the DRBC to support a COMPLETE ban on fracking once and for all throughout the Delaware River Watershed.
