

Dr. Elliot Goldberg

The ban was instituted after lengthy deliberation and with a great deal of scientific and health-related input. It is concerned with the health and well-being of millions of human beings. Opposition to the ban is based on ignoring not only science but also the wishes of the residents of the states affected. Opposition to the ban is based on the profit motive and NOTHING ELSE. A few would benefit financially whilst injuring the many. In other words, there is no excuse for it.
