

Emily van Alyne

Here in the United States we see many communities struggling against pollution, fossil fuel extraction, and more threats to their water sources. Recently, the Delaware River Basin Commission proposed regulations banning fracking in the River Basin. Unfortunately, those regulations don't protect ALL communities – they continue to allow for the exportation of water from the Basin to fracking elsewhere AND the importation of wastewater into the Basin for treatment. This is unacceptable – we cannot allow other communities to be harmed so we must tell the DRBC that we want ALL fracking banned from the Basin.
