

Trish Adlesic

I urge you to do all you can to protect the Delaware River. It supplies drinking water to 16 million people and we can't live without clean water. The Delaware is one of the most endangered rivers in America because fracking puts it at risk. I live near the river in Callicoon, New York and greatly benefit from using the river almost daily in the warm months. There are enough contaminants and pollutants in the environment already we can't afford to destroy another pristine resource. Please think of your children and their children and protect the river for future generations.

With much thanks,
Trish Adlesic
