Fracking and the land clearing, pipe lines, industrial and toxic materials associated with fracking bring short term prosperity and very very long term devastation and cost. This destructive works to further erode the social fabric already weakened rural communities. It is not in the long term interests of any community.

Although I do not reside in the Delaware Basin my water doesn't stay in my watershed either(that of Lake Ontario). Water is a case of what goes around comes around. Pollution doesn't stop at state lines and neither do economic impacts Keep the gas in the ground.
