

Rosie Starr

Here is the reason that I oppose hydraulic fracturing in the Delaware River Basin. My home is located on the Delaware River and drinking water is sourced from a well. There is a creek that runs through the property and empties into the Delaware River. Clean water, free of hazardous chemicals, is priority to a healthy life at home, in our community and our country.

The Pennsylvania DEP has issued hundreds of Determination Letters each saying that fracking has impacted a water source {see

<https://www.damascuscitizensforsustainability.org/pa-dep-determination-letters/>}.
I do not want to be a future recipient of one of these letters.

I urge you to enforce the Basin Compact and ban hydrofracking in the Basin.
