

Sandy Pelland

The Delaware River Basin is an environmental treasure!! We must have a permanent ban to protect it. It is the largest river on the eastern seaboard. This environmentally sensitive area supplies clean drinking water for more than 17 million people. The Commission must do their job to protect the drinking water for millions of people. Our drinking water must not be taken out of the Delaware River and fracking waste can not be dumped into the river. We all must work to get a complete ban on fracking in the basin!
