

Kelly Zimmerman

I am deeply concerned about this, the public has a RIGHT to speak up about our precious water in Pennsylvania! The deterioration of quality of potable and non potable water in pa has continued to increase over the years with the public notifications, without the public involvement shouldn't even EVER be allowed!! We the public tax payers should ALWAYS have a voice!! The Natural Gas drilling has destroyed millions of gallons of precious waters in pa and caused several to simply dry up...this is unacceptable!! I have lived in pa my whole life and have seen the continued disregard for safe clean water for drinking and wildlife! Streams turning black or milky whiteish...disgusting! People come from all over to fish, swim, boat, kayak, etc in the Delaware River spending thousands of \$\$\$, I don't think they want to swim in sewage or overly chemical treated waters!!! Wake up and get this right! DO NOT ELIMINATE the PUBLIC!!! And why would you eliminate the public comments?? What is being hidden??
