

## Robert Morrow

These proposed amendments give too much power to the DRBC's Executive Director. They allow the DRBC to make up its own version of the Freedom of Information Act. Projects that haven't even been started should not be allowed to have their deadlines extended on such a flimsy basis and at the whim of the Executive Director. And above all the LNG terminals and pipelines have to stop being approved. The nation and the world needs to move away from fossil fuels and this includes methane gas, the real name for "natural" gas.
