

jean public

1. resolve problems that commission proposes should be put to the public and taxpayers who are paying massively for this authority and their approval for any such changes must be necessary before any approval. taxpayers are being massacred with high taxes and costs. they need surcease.
2. spell out current practices in full. nobody wants to say ok to changes that are so ill defined.
3. foia and opra both should be used for the public to get information from this agency. responsibility of the agency to provide answers to questions of the public are necessary to a democracy. the public cannot allow to stand fascist authoritarian govt. this is a democracy and republic. respect it please.
4. there should be no alignment of pronouns necessary. this is not a woke group at all. there is no alignment necessary to use other than standard english which has been spoken by americans for the last over 200 years. we don't need more confusion to happen from this use of woke crap.
