

Mary Finan

Thank you very much. I would like to underline everything that Tracy Carluccio, Ms. Arindell, and others have said, I'll be really quick. And I will be sending in written comments. And I did register and I thought I had registered to speak. So I didn't understand because I registered a couple of weeks ago. Anyway, any changes to transparency must be to increase public notice and access. And I also think that all state versions of the Freedom of Info laws, AKA Sunshine Laws, need to be included wherever FOIA has been removed if you are going to continue to do that. So you should have FOIL and the New Jersey, all of them with their contact information because I believe people from outside the state can also search for information from other states. That's all I have to say right now. Thank you very much. And good luck.
