

## Laura Gilbertson

This permit should absolutely not be allowed. Supposedly the safety risk to residents of the town are low, but that most likely isn't the whole story. What about the other forms of life that have that body of water as their home? It's our responsibility as humans to take care of the environment we live in, and only taking into account the impact on humans is what has destroyed the planet. Corporations need to be held responsible for what they are doing, and there should be no place in this world for corporations that contaminate water-ways.
