

# Shaleas Harrison

Hello,

I am a resident of Park County who enjoys fishing, floating, and recreating in Boysen Reservoir and below the dam. I also work on my family's farm that we have had for over 5 generations. People below this reservoir use this water for agriculture and recreation. I entrust that the Wyoming DEQ will protect our way of life and our traditions.

It is absolutely imperative that you require Aethon Energy to treat the produced water to drinking quality standards. Proper monitoring needs to be done throughout this process to ensure this is happening. There should be zero frack chemicals in the water before it is piped it to the reservoir. Monitoring is essential to enforce this standard.

Thank you,

Shaleas
