

Candita Daniels

Please don't allow this inhumane practice to occur to our most precious resource...our Earth. We need to preserve our environment, keep our water systems clean. We owe it to ourselves to take care of the things we have been given. Our wildlife, beautiful outdoors, recreation areas, irrigation systems, farmers, ranchers, livestock, crops, children, families, and any other creature we share this earth with, deserve to have a clean water source. Don't contaminate it just because it is easy and cuts costs. Take the time and money to figure out a way to discharge wastewater in a way that will not harm anything. Protect our environment! Stop taking advantage of the little people...those little people, the majority, are your future! My family homesteaded in that area when they first came to America because it was a beautiful, untouched, perfect place to start a life, raise a family, own livestock, be one with mother nature. My family still lives in that area, ranching and farming...preserving what God gave us. They are providing your steak, your bread, and your vegetables that are in your house, in your refrigerator or on your table right now. If you destroy the most essential element everyone needs to survive...you are no better than a murderer or a terrorist. We have an obligation to protect and preserve! Figure out a better plan than your current plan of dumping millions of gallons of wastewater every day into our natural waters. Don't ruin our landscape with your thousands of wells that will destroy natural habitat and grazing areas for wildlife and livestock. Do not destroy our farmlands. Do not contaminate our water. We need a sustainable way of life and this is not it! **DO NOT POISON BOYSEN, THE WIND RIVER, THE BIG HORN RIVER, OR THE LAND AROUND THE PROPOSED MONETA DIVIDE PROJECT.**
