

## Luke Schultz

I am writing to urge you to consider reducing the amount of oilfield waste that can be discharged from the Aethon Energy field east of Boysen Reservoir. The proposal of over 8 million gallons daily is clearly a substantial health risk to downstream water users and recreationists in Boysen Reservoir and the Wind and Bighorn rivers. This move would threaten fisheries, recreation, human health and local economies. I urge you to consider other alternatives.

Thank you for your time,  
Luke Schultz
