

## Carol Turner

This email is in regard to the Aethon Proposed Discharge Permit in the Moneta Divide area. Please consider requiring the water be cleaned up by the company before any dumpig is allowed, into Boysen Reservoir and/or any drainage areas that pour into Boysen. Also, please establish a non-biased, on-going monitoring plan for the discharging. Boysen Reservoir is a primary source of recreation for thousands, year round. As well, the Rivers that flow with water from Boysen are highly prized for fishing. It is imperative that any water discharged into Boysen be made safe for wildlife, fish, and human use.

Thank you,  
Carol Turner
