

Toni Marosok

Please do not allow this to happen. This will poison waters forever-thus killing everything along with the water. We need to protect these precious waters/places-Not kill them. This will kill them!! You were put here to protect not murder in the name of \$\$\$\$\$\$. What is more precious than our waters and beautiful places. When all the trees are cut down, when all the water is polluted, when all the precious animals are killed off-will we then figure out that we can't eat money??
